PROGRAM DESCRIPTION

DIFFERENT STROKES FOR DIFFERENT FOLKS

This one-day seminar will be devoted to understanding Stroke in the adult population. The different types of strokes, along with the newest medical treatments and procedures available will be reviewed.

Current Best Stroke Practice in the areas of nursing and allied health will be presented. This will include discussion on current rehabilitation practice and examples of the continuum of care for the stroke patient.

PROGRAM OBJECTIVES

1. To understand the different types of strokes, their causes and how they affect the brain.
2. Be familiar with the current medical treatments and procedures available for stroke.
3. To have a greater understanding of what is considered Best Stroke Practice for stroke clients in nursing and rehabilitation.
